Veridos driver's license solution

The complete solution for modern driver's licenses

www.veridos.com

One piece of identification with multiple uses

The driver's license represents much more than a qualification to drive a motor vehicle. In North America, they serve as a citizen's primary form of government-issued photo identification. Veridos increases the security of province and state driver's license programs through enhancements to issuance and verification platforms backed by decades of experience.

As a key component of the overall identity infrastructure, it is vital to increase the effectiveness, efficiency, and convenience of driver's licenses and related infrastructure for the benefit of public authorities and license holders alike.

| HIGH-SECURITY DRIVER'S LICENSES

Veridos' extensive experience in high-security document production is at the heart of our sophisticated identification credential portfolio.

Our document experts have access to a full suite of innovative technologies that enable us to provide our customers with documents uniquely suited to their needs.

Veridos driver's license cards conform to the latest AAMVA DL/ID Card Design Standard (CDS). With security at the heart of everything we do, our cards are designed according to AAMVA Design Principles and Guidelines for Secure DL/ID Cards (SCDP). Additionally, we follow the highest safety and quality standards laid out e.g. by ANSI, NIST, DHS and other organizations.

| FULL DOCUMENT LIFECYCLE SYSTEM

Veridos offers end-to-end lifecycle management services for driver's license issuing authorities and law enforcement.

Our driver's license document lifecycle management solution manages all aspects of driver's license issuance from enrollment and high-quality image capture through to personalization and issuance.

Veridos also provides tools and technology to efficiently detect and verify genuine identity documents.

Driver's licenses that are
secure and trusted

Be prepared for the future with our digital solutions

VeriGO® DriveID: A MOBILE DRIVER'S LICENSE THAT IS USER-FRIENDLY AND SECURE

VeriGO® DriveID is a smartphone-based driver's license solution with smart backend system. The driver's license data is pulled from the database and made available through our secure application.

The digital driver's license can be presented for contactless verification upon inspection. Contactless authentication means the process is not reliant on the visual inspection of security features by verifying personnel, but rather the establishing of cryptographic trust by allowing the system itself to verify the document.

Mobile driver's licenses offer numerous benefits to citizens and countries alike. Available both on and offline, our digital driver's license is built with the user in mind. Minimizing the data shared when appropriate, for authorization or age verification purposes. All users can trust that the digital ID is always valid and current.

DIGITAL SERVICE DELIVERY SOLUTIONS FOR MOTOR VEHICLE DEPARTMENTS

Veridos also offers a wide range of alternative digital service delivery solutions that increase operational efficiency for Motor Vehicle Departments. These solutions include the remote renewal of driver credentials, digital document submission and verification, kiosks, and queuing systems.

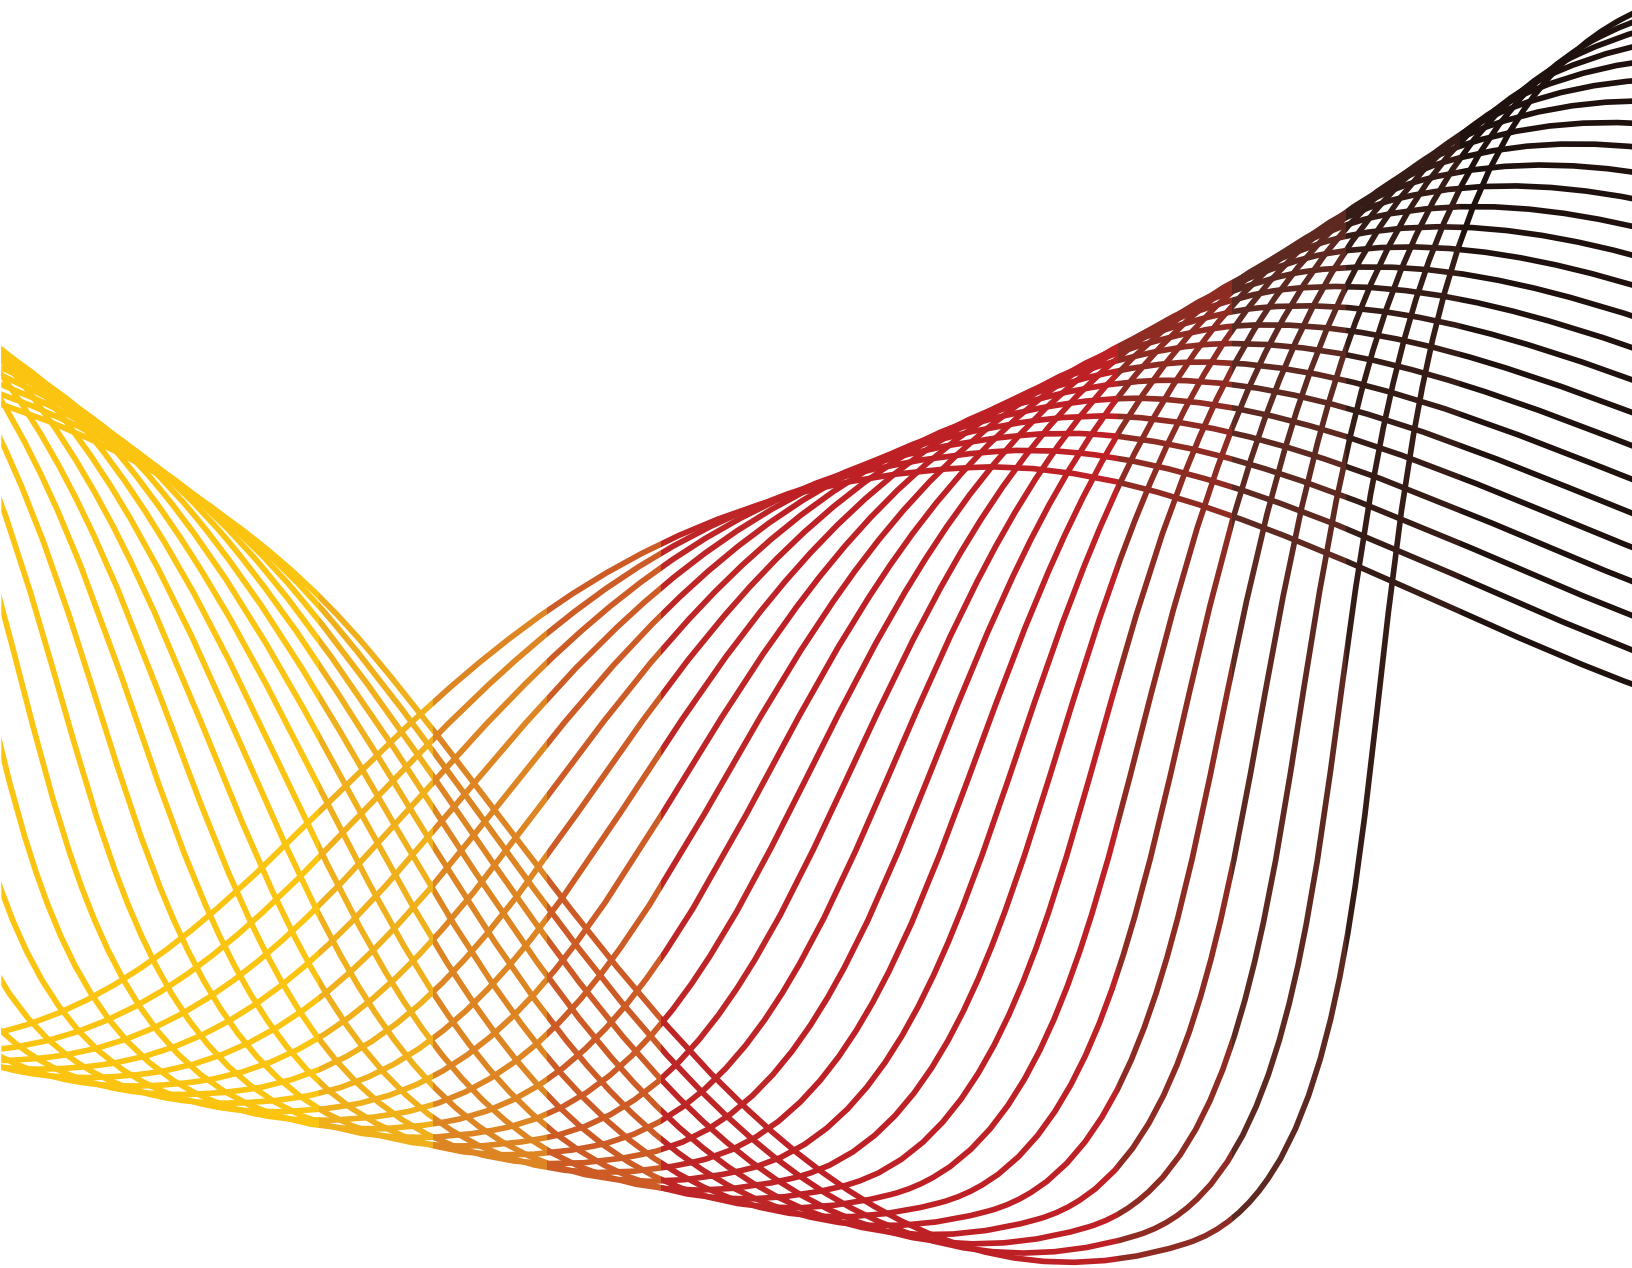

In today's ever digitalized world, it is fundamental that these solutions are adopted by Motor Vehicle Departments in order to offer services to citizens in a simple and secure manner while being cost effective.
